Creates Sensation In New Orleans

L. T. Cooper, the young philanthropist, who, with his strange new medicines, has been exciting much attention from newspapers all over the country now has New Orleans in a storm of enthusiasm over his remarkable work. The sale of his preparations have reached enormous figures and the wonderful cures of stomach trouble and rheumatism accredited to his medicines which were at first the subject of much conjecture have become so common that their genuineness can no longer be doubted.

His theory that 50 per cent of the so-called stomach trouble is due to immense parasites, or tape worms, is verified in nearly every case reported. Wherever he goes people bring to him glass jars and dishes containing these parasites which have been expelled from their systems by his medicines. Nearly three hundred of these cases are reported from New Orleans and in almost every instance the patient had been unaware that his suffering was caused by anything more than or dinary stomach trouble.

Mr. A. R. Haile, a prominent business man of 1419 Carondelet street, New Orleans, is authority for the report of one of the most remarkable of these cases. According to his statement, Mr. Haile had been a sufferer from a severe affection of the stomach for the past six years and had been treated by physicians who diagnosed his case one of tape worm but whose treatment failed to relieve him. Speaking of his experience with Cooper's preparations he said: "My case has from those who have used them.

been a stubborn one and nothing I could do seemed to alter my condition. Several physicians treated me without result and when Cooper's medicines began to create so much attention determined to give them a trial.

The worm which they expelled from my system measured nearly 50 feet in length and as soon as I was rid of the horrible thing I began to improve." Upon being asked about the attendant symptoms he declared that they are much similar to those of any stomach disorder, a variable appetite, dizzy spells, headaches, constipation, nervousness and continual languid, tired, worn out feeling being the most common while one of the surest signs is dark spots that appear to float before the vision after stooping over.

Wallerstein's Bells

Prizes for the Best Two

Probably, every man, woman and child in Paducah knows of the great success of our "at home" last Thursday, and the hit we made with our souvenir bells.

You could see, and hear them all over the city; the aldermen were disturbed in their deliberations, and called on the chief of police to quiet the racket, and many a sleeper awakened by "the tinkle of the bells," Wallerstein's bells

The incident was deemed worthy of notice by the newspapers and has suggested an idea to us. We want a composition, or story, as the newspapers call it, or a verse upon it, and shall offer two prizes of five dollars in gold each for the best article written by a girl and the other for the best article written by a boy. The composition to contain two hundred words or less.

The contest is open to every school boy or girl in Paducah, and the contributions must be in our office by Saturday at noon. Mr. R. B. Willson, editor of the News-Dem ocrat, and Mr. L. V. Armentrout, of The Sun, will be the judges, and make the awards, and the prize contributions will be published early next week.

Read the announcements of the opening in the afternoon papers of Wednesday and Thursday, and the newspaper comments on the incident in Friday's papers for material for your composition

EXHAUST SUPPLY OF WORLD'S WOOD

Scientists See A New Danger For Future Generations.

United States Has Not Sufficient for Her Own Needs and Draws on

STARTLING

vorld, so the scientists figure, nearng the brink of a famine in iron and a shortage in its coal supply, it deelops that the stock of wood is also serious danger of giving out.

Consul William G. Teichaman riting from Elbenstock, in Saxony, o the state department, discusse this subject of the world's supply and finds it diminishing at an alarming

It was expected that when coal came in as a substitute for wood the demand for wood would diminish. Instead, this demand has gone on in

The North American problem not a light one. Once the United States was the possible wood storehouse of the world but it has not enough now to supply its own demand though having 506,555,000 acres of wooded area. It is dependant upon Canada, which with its 798,133,000 acres of forests, represents probably the largest single area of any country in the world. Canada sends its entire surplus to the United States.

Mr. Telchaman says that although large territories of forests especially China, Korea, India and South America remain to be utilized it is certain the question of the future wood supply of the world, now attracting the attention of economists, will continue to excite great interest.

'The continuation of the present wood consumption without comprehensive reforesting, will within a century at the very latest, result in a great and very important scarcity of the wood supply," predicts Mr

Some details of wood consumption are given in the report. Mr. Teichaman says the coal mines of Belgium called for 1,742,749 square yards of wood for the various purposes to which wood is put in mines in 1903. Each year a renewal of old supports is taking place and new ones are being put into new galleries. Railroads eat up enormous quantities o wood in crossties. Add to these etc., one will have tons running into millions each year. Importations of wood by some of the European countries are heavy. England leading with imports of 16.342.000 yards per annum. Germany is second with 11, 766,667 yards, and France third with 8,496 300 yards.

Russia leads European countries in exportation of wood, sending out 9,-544, 474 cubic yards per year. This does not include Finland, which alone exports 4,000,000 cubic yards, and

most unknown forests. "Nevertheless," advises Consul Telchaman, "it ed with the New York National yields a great profit. would be well not to exaggerate the dimensions of these wood supplies.

"Many African forests are really composed of nothing better than thin bushes, and Siberia is already being systematically subjected to deforesting, which will also begin in Korea in the near future."

TWO STORKS GIVEN ROOSEVELT

Birds Said to Be Kaiser's Gift, Arrive on Liner Amerika.

New York, Oct. 23 .- Two storks a gift to President Roosevelt, arrived today on the steamship Amerika. Consigned to the American Express company, which will forward them to Washington, the two birds were put in the care of Chief Officer Reuss by Mr. Hagenbeck, the animal dealer of Hamburg, who is said by Mr. Reuss to be the donor though a persistent rumor on shipboard had it that the actual giver is the emperor of Germany, who takes this method of encouraging the w'l known antirace suicide views of the president. Caged in an open crate the storks, one a male and the other a female, passed most of their time on the boat deck abaft of the pilot house, where In spite of a sign on their habitation "Take care, they will bite," they became the center of interest for the first cabin passengers.
